

# 842III Wheel Loader

## Customer Report

Market: The Netherlands  
Dealer: Hansan Bouwmachines B.V.  
Customer: Municipality of Oss composting/recycling  
Operator: Henry Keijzers

# The 842III at work

My name is Henry Keijzers and I work for the Municipality of Oss at their composting and recycling facility, which serves the local town to assist with waste disposal. The town is the capital of a large municipality, which has merged several smaller towns together in the past two decades.

Oss is an industrialised region in the north of the North Brabant province with a population of almost 85,000 people. It is famous as the birthplace of retired Dutch footballer Ruud van Nistelrooy as well as leading companies Unilever, Organon/MSD and Heesen Yachts.

The composting and recycling facility is open six days a week, all year round and annually we move 22,000 cubic metres of compost and other recyclable materials for transportation. This means that all of our machines work hard, so productivity and durability are important, as well as good aftersales service to minimise downtime. Most of the green waste is transported to an energy company to create power.

However, most of the waste is not so clean, so the smell from the compost area is very strong. The LiuGong 842III that I am now operating, has been fitted with a modern side-mounted filter to allow clean air into the cab for health and safety reasons and to make my working day more pleasant and comfortable. I keep the cab door closed throughout the day, so that I can enjoy clean, fresh air.

To further ensure that I am not exposed to any toxic materials, the cab(ine) was removed from the machine when fitting the filter to deal with the over pressure – this means the pressure inside the cab is slightly higher than the atmospheric pressure, which helps to protect me from any contaminated air.

**"I am very happy with the machine so far. It is easy to use and we have good local support from the dealer, Hansan."**

Changes were also made to the hydraulics, a quick coupler was added and we specified some additional technical equipment for the cab. I am very happy with the machine so far. It is easy to use and we have good local support from the dealer, Hansan.

We have previously bought machines from them, but not for at least eight years. However, they have a base just 7km away from our facility, so their local support, price and availability all drove the decision to buy LiuGong. We have not been disappointed; the machine seems strong, durable and easy to use.

## 842III TECHNICAL SPECIFICATIONS

<b>STANDARD BUCKET CAPACITY</b>	2.7 m <sup>3</sup>
<b>OPERATING WEIGHT</b>	15,000 kg
<b>NET POWER</b>	137 kW (184 hp) @ 2,200 rpm
<b>BUCKET BREAKOUT FORCE</b>	136 kN
